Dr. Sereno Watson,

Cambridge, Mass.

Dear Sir:- A recent letter from Prof. John M. Coulter contains the probable name of a new Eriogon-
ia found last year by my friend ^{the} Rev. F. D. Kelsey, of Helena, Mont., in the Cañon of the Missouri. Prof. Coulter writes for more material of the plant. I have written to Mr. Kelsey to send all he can spare of his own small specimens accompanied by as full notes as possible on the mode of growth and general habit of the plant. We have not had opportunity of obtaining any specimens since Mr. K. found the original one.

Our Roses here ^{have} perplexed me sorely. Prof. Coulter ~~to~~ ^{has} written to you for your revision of N. A. Roses. Kindly drop me a card, when you have time, stating price & postage of the work and I will remit for a copy of the same.
Very truly Yours -
W. Anderson.
